“Love this product!”
I used these when presenting a keynote to over 200 people at a conference. Rather than “lecturing” them for 90 minutes, we were able to interact and connect with “real-time” comments and feedback. It was fun and provided an unexpected enhancement and connection. I placed one whiteboard paddle with eraser and marker on each table, and it worked very well!

how to pick the best FIDGET TOYS

10 WAYS to choose the tool that’s best for YOUR NEEDS!

1 **MATERIAL**
What’s it made of?
Pick materials that are personally pleasing! Firm, flexible, furry, hard, smooth, squishy – whatever floats your boat!

2 **WHO**
Kids? Adults?
Personal use?
Community use?
If you plan on sharing, choose fidgets that can be easily cleaned. Avoid putty, sand and clay.

3 **MOTION**
Do you like to twist, twirl, bend, flex or squeeze?
Become a master of movement with fidgets you can mold, manipulate, click, squeeze or rotate.

4 **SIZE**
Prefer pocket toys, bigger handfuls or one-handers?
Go incognito and hide your fidget in a pocket or under a desk. Or, engage more muscles with a chunkier choice.

5 **EYE-CANDY**
Are good looks a plus or distracting?
Colorful, eye-catching fidgets set a playful tone, but fidgets shouldn’t be too distracting or mesmerizing.

6 **SOUND**
Is silence golden or are simple sounds suitable?
Respect your environment and save loud fidgets for more boisterous settings.

7 **COST**
Buy a bunch at a low cost or choose one snazzy favorite!
Find fidgets for any budget. Low-cost fidgets are great giveaways. Spend more on therapeutic toys that won’t get lost!

8 **DURABLE**
Are users rough or gentle?
For fidgeters who put their toys to the test, avoid gel balls and other items that can be punctured or snapped.

9 **WEIGHT**
Need some heft or is lightweight better?
Heftier fidgets can feel more substantial and satisfying. Stay clear of flimsy fidgets.

10 **FUN FACTOR**
Focus on fun or function?
Sometimes you just want your fidget to make you smile.

Also, every one of our Air General locations was issued one or more themed Thumbballs to use at the start of meetings or briefings. Thank you!

Timothy Cotter, Air General

I stick to the ‘Law of Seven Minutes’: never conduct an icebreaker for more than seven minutes. I would rather lead three activities in a 20-minute period, than a single activity in that time. Attention spans are short, so keeping activities brief ensures that energy and engagement will remain high. Having lots of resources at my fingertips, including TeamWork TeamPlay cards, is key!

Dr. Jim Cain, Author and Consultant

I bought a collection of fidget items and put them in a pre-K classroom. When children get anxious or emotional or upset, they can go to the quiet corner and have one of the items in their hands and it helps. Young children learning to regulate their emotions often need something physical to manipulate. The fidgets calm them by giving them something to do with their hands and something else to think about.

Hi, Susan, Trainers Warehouse is our GO TO supplier. One of the things we’ve learned is that busy professionals find it almost mentally and physically painful to sit still in a classroom for an extended period. To ease that discomfort, and to encourage them to put down their electronic devices, we always provide one of your fidget toys. It’s also a great ice breakers... after we’ve passed around a giant bowl full and everyone has one, we ask the question and let each one respond: “What does your choice of fidget toy say about your mood or what you bring to class today?”

All the best,
